INDEX TO VOLUME XXI

Agglutination, The, titre of milk as an indicator of the presence of milk as an indicator of the presence of *Bact. abortus* in milk. Abstract..... 53
Ammonia and indol production, The effect of yeast on, by bacteria in culture and in feces suspension..... 225
Anaerobe, Cellulose-fermenting, Isolation and study of an apparently widespread, *Cl. cellulosolvens* (N. sp.?)..... 167
Ascobacillus, Conjunction of disexual forms in. A preliminary report..... 305
Atwood, Catharine, Medalia, Leon S. and Bailey, Karl R. A modified Loeffler's blood serum medium useful in the routine health department examination for diphtheria and streptococcus infections..... 119

B. actinoides variety *muris*, The biological characters of..... 183
Bacillus diphtheriae in its relationship to bacteriophage..... 75
—— *radiobacter* in reference to commercial legume inoculants. Abstract... 35
Bacteria, Fate of fresh water, in the sea..... 287
—— producing trimethylene glycol. Abstract..... 6
——, Studies on the influence of, on the oxidation-reduction potential of milk. I. Influence of pure cultures of milk organisms..... 239
——, Studies on the influence of, on the oxidation-reduction potential of milk. II. Influence of associated cultures of milk organisms..... 253
——, Studies on the proteolytic, of milk. V. Action of proteolytic bacteria on milk serum..... 263
——, The effect of sterilization of media upon their growth promoting properties toward..... 299
——, The effect of yeast on ammonia and indol production by, in culture and in feces suspension..... 225
——, The staining of flagella of, with special reference to mordants..... 313
Bacterial growth-inhibiting substance, Do broth culture filtrates contain a?..... 395
Bacterial media, solid, A comparison of colorimetric and potentiometric methods for hydrogen ion determination of, using a dilution method based on the buffer equation..... 383
—— spores..... 330
—— spores, Influence of surface tension upon the germination of..... 211
——, The, culture as an electrical half-cell. Abstract..... 18
Bactericidal, The, efficiency of certain organic peroxides. Abstract..... 55
Bacteriological, A, incubator for uniform temperatures with accurate control. Abstract..... 24
—— studies before and after chlorination at the Madison sewage disposal plant. Abstract..... 9
——, The, evaluation of some new water soluble organomercury compounds... 323

Bacteriology and medicine, Reciprocal effects of the relationship of..... 61
——, The, of household dusts. Abstract..... 14
Bacteriophage, A, for *B. anthracis*..... 161
——, A quantitative study of the respiration of staphylococcus cultures lysed by..... 143
——, *Bacillus diphtheriae* in its relationship to..... 75
Bailey, Karl R., Medalia, Leon S. and Atwood, Catharine. A modified Loeffler's blood serum medium useful in the routine health department examination for diphtheria and streptococcus infections..... 119
Baird, Lenna A. and Burke, Victor. Fate of fresh water bacteria in the sea... 287
Baldwin, I. L., Eckhardt, Marie McL. and Fred, E. B. Studies of the root-nodule organism of Lupinus..... 273
Barnes, L. A. Do broth culture filtrates contain a bacterial growth-inhibiting substance? Abstract..... 10
Barnes, L. A. Do broth culture filtrates contain a bacterial growth-inhibiting substance?..... 395
Bates, P. K. and Prescott, Samuel C. On the relation of refrigeration temperatures to the rate of growth of certain specific types of bacteria causing food spoilage. Abstract..... 25
Bates, Philip K. and Prescott, Samuel C. The reduction of the number of organisms in water as a result of freezing in domestic refrigerators. Abstract..... 26
——, ——, ——, —— and Needle, H. C. The effect of discontinuous refrigeration on bacteria in foods. Abstract..... 25
Bayne-Jones, Stanhope. Reciprocal effects of the relationship of bacteriology and medicine..... 61
Behrens, C. A. Multiple antibody production. Abstract..... 46
Bile as an antigen in serum diagnosis of syphilis. Abstract..... 48
Biochemical studies of bacterial derivatives. XV. Skin reactions in man: A comparison of tuberculin O.T., human tubercle bacillus protein MA 100 and timothy bacillus protein MA 100. Abstract..... 57
Biological and chemical studies of the Lactobacillus genus with special reference to xylose fermentation. Abstract..... 4
—— studies of the acid-fast organism. Abstract..... 11
——, The, characters of *B. actinoides* variety *muris*..... 183
Boak, R. A. and Carpenter, C. M. Lethal temperatures for *Br. abortus* with special reference to pasteurization. Abstract..... 54
Broadhurst, Jean, Moriyama, Yone, and Pease, Dorothy. Conjunction of disexual forms in Ascobacillus. A preliminary report..... 305
——, and Pease, Dorothy. Dimorphic sexual reproduction in bacteria. Abstract..... 9
Broth culture filtrates, Do, contain a bacterial growth-inhibiting substance?.. 395
Brunstetter, B. C. and Magoon, C. A. Studies upon bacterial spores. III. A contribution to the physiology of spore production in *B. mycoides*. Abstract..... 33
Buffer equation, A comparison of colorimetric and potentiometric methods for hydrogen ion determination of solid bacterial media, using a dilution based on the..... 383

Burke, Victor and Baird, Lenna A. Fate of fresh water bacteria in the sea.... 287
——, Conn, H. J., Chairman, Cohen, Barnett, Genung, Elizabeth F., Hall, Ivan C., Kulp, W. L. Report of committee on bacteriological technic: Progress during 1930. Abstract..... 1
Burkey, L. A. Methods for determining the persistence of certain important bacteria in Swiss cheese. Abstract..... 40
Burrows, William and Tanner, F. W. The viability of yeasts in sucrose solutions. Abstracts..... 32

Cameron, E. J. The "natural" or "normal" resistance of spores of thermophilic bacteria. Abstract..... 31
Carbohydrate utilization, End products of, as determined in synthetic media cultures. Studies on carbon metabolism of organisms of the genus Mycobacterium. III..... 375
Carbon metabolism of organisms of the genus Mycobacterium, Studies on. II. Utilization of organic compounds in a synthetic medium..... 361
—— —— —— —— —— ——, Studies on. III. End products of carbohydrate utilization as determined in synthetic media cultures..... 375
Carpenter, C. M. and Boak, R. A. Lethal temperatures for *Br. abortus* with special reference to pasteurization. Abstract..... 54
Casman, E. P. and Rettger, L. F. Some factors limiting bacterial growth at higher temperatures. Abstract..... 27
Castaneda, M. Ruiz and Zinsser, Hans. Studies on typhus fever. Abstract.. 43
Characteristics, The, of certain microörganisms as modified by the reaction of the medium. Abstract..... 18
Chinn, Ben, Ruchhoft, C. C., Kallas, J. G. and Coulter, E. W. Coli-aerogenes differentiation in water analysis..... 407
Cl. cellusolvens (N. sp.?), Isolation and study of an apparently widespread cellulose-fermenting anaerobe..... 167
Clague, J. A. and Fellers, C. R. Time-temperature-humidity relations in dried fruit pasteurization. Abstract..... 30
Clark, L. T. and Ferry, N. S. Studies of the properties of a bouillon filtrate of the gonococcus. Abstract..... 58
Clifton, C. E. The problem of ultrafiltration. Abstract..... 7
Cohen, Barnett. The bacterial culture as an electrical half-cell. Abstract... 18
——, Conn, H. J., Chairman, Burke, Victor, Genung, Elizabeth F., Hall, Ivan C., Kulp, W. L. Report of committee on bacteriological technic: Progress during 1930. Abstract..... 1
Coli-aerogenes differentiation in water analysis..... 407
Colonial variation of *Escherichia coli* on solid media with especial reference to the production of rough colonies. Abstract..... 13
Colorimetric and potentiometric methods, A comparison of, for hydrogen ion determination of solid bacterial media, using a dilution method based on the buffer equation..... 383
Colosi, Natale. Bile as an antigen in serum diagnosis of syphilis. Abstract.. 48
Comparative, A, and taxonomic study of thirty-eight strains of *Bacillus tertius* (Henry). Abstract..... 2
—— investigations on the microbiological composition and the quality of butter. Abstract..... 41

Comparison, A, of colorimetric and potentiometric methods for hydrogen ion determination of solid bacterial media, using a dilution method based on the buffer equation..... 383
——, A, of methods for determination of potency as observed on a group of horses immunized against diphtheria. Abstract..... 46
Conjunction of disexual forms in Ascobacillus. A preliminary report..... 305
Conn, H. J. The effect of certain simple non-nitrogenous salts on the growth of bacteria in soil. Abstract..... 35
——, Chairman, Burke, Victor, Cohen, Barnett, Genung, Elizabeth F., Hall, Ivan C., Kulp, W. L. Report of committee on bacteriological technic: Progress during 1930. Abstract..... 1
Continuous, The, lactic fermentation of whey. Abstract..... 37
Contribution, A, to the physiology of spore production in *B. mycoides*. Studies upon bacterial spores. III. Abstract..... 33
Copper sulphate medium for the isolation of *Br. abortus* (Bang) from milk. Abstract..... 53
Coulter, E. W., Ruchhoft, C. C., Kallas, J. G. and Chinn, Ben. Coli-aerogenes differentiation in water analysis..... 407
Cowles, Philip B. A bacteriophage for *B. anthracis*..... 161
—— and Rettger, Leo F. Isolation and study of an apparently widespread cellulose-fermenting anaerobe, *Cl. cellulosolvens* (N. sp.?)..... 167
Cromwell, H. W. and Moore, Marjorie B. Studies on pollen and pollen extracts. VI. Rabbit skin reactions in quantitative estimation of activity of pollen extracts. Abstract..... 59
Cultural characteristics of *Neisseria gonorrheae*. Abstract..... 48
Curran, Harold R. Influence of osmotic pressure upon spore germination.... 197
—— Influence of surface tension upon the germination of bacterial spores..... 211
—— The origin of the growth restraining substance in raw milk and the action of this substance upon an organism of the sweet curdling type. Abstract..... 38

Delves, Edna, Hadley, Philip, Klimek, John. The filtrable forms of bacteria. Abstract..... 7
Demeter, Karl J. and Maier, F. X. Comparative investigations on the microbiological composition and the quality of butter. Abstract..... 41
Demonstration of a simple anaerobic culture dish. Abstract..... 23
Denitrifying organism, A marine..... 89
Development of flagella on germinating spores..... 357
Dimorphic sexual reproduction in bacteria. Abstract..... 9
Diphtheria and streptococcus infections, A modified Loeffler's blood serum medium useful in the routine health department examination for..... 119
Direct, A, method for the determination of the H-ion concentration of cultures. Abstract..... 22
Disexual forms, Conjunction of, in Ascobacillus. A preliminary report.... 305
Dissociation in an encapsulated staphylococcus..... 157
—— of *Myco. leprae*. Abstract..... 12
Do broth culture filtrates contain a bacterial growth inhibiting substance? Abstract..... 10

Do broth culture filtrates contain a bacterial growth inhibiting substance?... 395
Domogalla, Bernard. Bacteriological studies before and after chlorination at the Madison sewage disposal plant. Abstract..... 9
Downs, Cornelia M. Studies of tularemia infection in rabbits and guinea pigs. Abstract..... 50
—— and Gottlieb, Selma. Studies on the precipitin reaction. III. Further studies on conditions influencing the formation of precipitates. Abstract..... 47
Drying, The, of bacteria and the viability of dry bacterial cells. Abstract.... 13

Eaton, Monroe D., Jr. A quantitative study of the respiration of staphylococcus cultures lysed by bacteriophage..... 143
Eckhardt, Marie McL., Baldwin, I. L. and Fred, E. B. Studies of the root-nodule organism of Lupinus..... 273
Effect, The, of bacterial by-products on leucocytes. Abstract..... 42
——, The, of certain simple non-nitrogenous salts on the growth of bacteria in soil. Abstract..... 35
——, The, of concentrated salt and sugar solutions on the thermo-death times of molds. Abstract..... 32
——, The, of discontinuous refrigeration on bacteria in foods. Abstract..... 25
——, The, of sterilization of media upon their growth promoting properties toward bacteria..... 299
——, The, of temperature upon the production of hydrogen sulphide by *Salmonella pullorum*..... 111
——, The, of urine on hemolytic streptococci. Abstract..... 49
——, The, of yeast on ammonia and indol production by bacteria in cultural and in feces suspension..... 225
Effects, The, of alkaloids on bacteria. Abstract..... 55
Electrophoresis studies on *Lactobacillus acidophilus* and *Lactobacillus bulgaricus* cultures. Abstract..... 51
End products of carbohydrate utilization as determined in synthetic media cultures. Studies on carbon metabolism of organisms of the genus Mycobacterium. III..... 375
Ergosterol content of certain species of Mycobacterium and the effect of ergosterol (activated and unactivated) on their growth. (final report) Abstract..... 9
Evans, Alice C. The effect of bacterial by-products on leucocytes. Abstract..... 42

Factors, Some, limiting bacterial growth at higher temperatures. Abstract.. 27
Fate of fresh water bacteria in the sea..... 287
Feces suspension, The effect of yeast on ammonia and indol production by bacteria in culture and in..... 225
Fellers, C. R. and Clague, J. A. Time-temperature-humidity relations in dried fruit pasteurization. Abstract..... 30
Fermentation, The, of polyhydric alcohols by the colon-aerogenes groups of bacteria. Abstract..... 11
Ferry, N. S. and Clark, L. T. Studies of the properties of a bouillon filtrate of the gonococcus. Abstract..... 58

Field, J. Thomas and Poe, Charles F. The fermentation of polyhydric alcohols by the colon-aerogenes groups of bacteria. Abstract..... 11
Filtrable, The, forms of bacteria. Abstract..... 7
Flagella, Development of, on germinating spores..... 357
—— of bacteria, The staining of, with special reference to mordants..... 313
Floral changes in the fermentation of sauerkraut. Abstract..... 36
Foter, M. J. and Stark, C. N. The importance of feeds as a source of ropy milk organisms. Abstract..... 37
Fowls and chickens, Saprophytic and secondary microörganisms occurring in the respiratory tracts of domestic fowls and chickens in health and disease..... 97
Frazier, William C. and Rupp, Philip. Studies on the proteolytic bacteria of milk. V. Action of proteolytic bacteria on milk serum..... 263
—— and Whittier, Earle O. Studies on the influence of bacteria on the oxidation-reduction potential of milk. I. Influence of pure cultures of milk organisms..... 239
—— and ——. Studies on the influence of bacteria on the oxidation-reduction potential of milk. II. Influence of associated cultures of milk organisms..... 253
—— and Wing, Helen U. Studies on the eye-forming organism of Swiss cheese. Abstract..... 39
Fred, E. B., Eckhardt, Marie McL. and Baldwin, I. L. Studies of the root-nodule organism of Lupinus..... 273
Fulmer, Ellis I., Williams, Arthur L. and Werkman, C. H. The effect of sterilization of media upon their growth promoting properties toward bacteria..... 299
Funk, E. H., Huntoon, F. M. and White, Harry. Biochemical studies of bacterial derivatives. XV. Skin reactions in man: A comparison of tuberculin O.T., human tubercle bacillus protein MA 100 and timothy bacillus protein MA 100. Abstract..... 57
Further studies on conditions influencing the formation of precipitates. Studies on the precipitin reaction. III. Abstract..... 47

Genung, Elizabeth F., Conn, H. J., Chairman, Burke, Victor, Cohen, Barnett, Hall, Ivan C., Kulp, W. L. Report of committee on bacteriological technic: Progress during 1930. Abstract..... 1
Genus, The, leuconostoc. Abstract..... 3
Germinating spores, Development of flagella on..... 357
Gibbs, Charles S. Do saprophytic and secondary bacteria occurring in the respiratory tracts of domestic fowl in infectious trachitis and in health produce agglutinins in the blood? Abstract..... 45
—— Saprophytic and secondary microörganisms occurring in the respiratory tracts of domestic fowls and chickens in health and disease..... 97
Gilbert, Isabelle. Dissociation in an encapsulated staphylococcus..... 157
Gillen, G. and Werkman, C. H. Bacteria producing trimethylene glycol. Abstract..... 6
Gilman, Herbert L. The agglutination titre of milk as an indicator of the presence of *Bact. abortus* in milk. Abstract..... 53

Gottlieb, Selma and Downs, Cornelia M. Studies on the precipitin reaction. III. Further studies on conditions influencing the formation of precipitates. Abstract..... 47
Gradwohl, R. B. H. Cultural characteristics of *Neisseria gonorrheae*. Abstract..... 48

Hadley, Philip, Delves, Edna, and Klimek, John. The filtrable forms of bacteria. Abstract..... 7
Hale, J. F., Prescott, Samuel C., and White, G. E. Observations on the bacteriology of slimy beef. Abstract..... 26
Hall, Ivan C., Conn, H. J., Chairman, Burke, Victor, Cohen, Barnett, Genung, Elizabeth F., and Kulp, W. L. Report of committee on bacteriological technic: Progress during 1930. Abstract..... 1
—— and VanVranken, Marjorie. A comparative and taxonomic study of thirty-eight strains of *Bacillus tertius* (Henry). Abstract..... 2
Health department examination for diphtheria and streptococcus infections, A modified Loeffler's blood serum medium useful in the routine..... 119
Hemolytic streptococcus carriers, An improved method for the detection of..... 219
Herrington, B. L. and Stark, C. N. The drying of bacteria and the viability of dry bacterial cells. Abstract..... 13
Hicks, Robert Alan and Szymanowski, Waclaw T. A study of the action of short electric waves on several biological substances with special reference to diphtheria toxin. Abstract..... 59
Hollon, Harriett C. and Kendrick, Pearl. Serologic and bacteriophagic relationships in a group of fecal streptococci. Abstract..... 49
Horwood, Murray P. The bacteriology of household dusts. Abstract..... 14
Hotchkiss, Margaret. Presence of fusiform bacilli and spirochetes in the mouths of a group of young adults. Abstract..... 44
Hucker, G. J. and Pederson, C. S. The genus leuconostoc. Abstract..... 3
Huddleson, I. Forest. Copper sulphate medium for the isolation of *Br. abortus* (Bang) from milk. Abstract..... 53
Humus as a source of energy for soil microörganisms, and the energy liberated by their activity. Abstract..... 33
Hunter, Charles A. Colonial variation of *Escherichia coli* on solid media with especial reference to the production of rough colonies. Abstract..... 13
Huntoon, F. M., Funk, E. H. and White, Harry. Biochemical studies of bacterial derivatives. XV. Skin reactions in man: A comparison of tuberculin O.T., human tubercle bacillus protein MA 100 and timothy bacillus protein MA 100. Abstract..... 57
Hydrogen ion determination of solid bacterial media, A comparison of colorimetric and potentiometric methods for, using a dilution method based on the buffer equation..... 383
—— sulphide, The effect of temperature upon the production of, by Salmonella pullorum..... 111

Importance, The, of feeds as a source of ropy milk organisms. Abstract... 37
Improved, An, method for the detection of hemolytic streptococcus carriers..... 219

Influence, The, of antigen-diluents on the intensity of flocculation in the precipitation test for syphilis. Abstract..... 47
—— of surface tension upon the germination of bacterial spores..... 211
—— of osmotic pressure upon spore germination..... 197
Isolation and study of an apparently widespread cellulose-fermenting anaerobe, *Cl. celluosolvens* (N. sp.?)..... 167
Investigation, An, of the antiseptic and germicidal efficiency of Pyridium on various organisms. Abstract..... 54

Jamieson, W. A. and Powell, H. M. Merthiolate as a preservative for biological products. Abstract..... 55
Jennison, M. W. A bacteriological incubator for uniform temperatures with accurate control. Abstract..... 24
Jensen, Otto G., Lisse, Martin W. and Tittsler, Ralph P. A comparison of colorimetric and potentiometric methods for hydrogen ion determination of solid bacterial media, using a dilution method based on the buffer equation..... 383
Jordan, Elizabeth F. and Smith, George H. *Bacillus diphtheriae* in its relationship to bacteriophage..... 75

Kallas, J. G., Ruchhoft, C. C., Chinn, Ben, and Coulter, E. W. Coli-aerogenes differentiation in water analysis..... 407
Kendrick, Pearl and Hollon, Harriett C. Serologic and bacteriophagic relationships in a group of fecal streptococci. Abstract..... 49
Klimek, John, Hadley, Philip, Delves, Edna. The filtrable forms of bacteria. Abstract..... 7
Kopeloff, Nicholas and Upton, Margaret F. Serologic studies with *L. acidophilus* (Moro) and *L. bulgaricus* (Grigoroff). Abstract..... 51
Krumwiede, Charles, 1879–1930..... 141
Kulp, W. L., Conn, H. J., Chairman, Burke, Victor, Cohen, Barnett, Genung, Elizabeth F., Hall, Ivan, C. Report of committee on bacteriological technic: Progress during 1930. Abstract..... 1

Leifson, Einar. Bacterial spores..... 330
—— Development of flagella on germinating spores..... 357
Leonard, Lewis T. *Bacillus radiobacter* in reference to commercial legume inoculants. Abstract..... 35
Lethal temperatures for *Br. abortus* with special reference to pasteurization. Abstract..... 54
Lisse, Martin W., Jensen, Otto G., and Tittsler, Ralph P. A comparison of colorimetric and potentiometric methods for hydrogen ion determination of solid bacterial media, using a dilution method based on the buffer equation..... 383
Lloyd, Blodwen. A marine denitrifying organism..... 89
Loeffler's blood serum, A modified, medium useful in the routine health department examination for diphtheria and streptococcus infections..... 119
Lupinus, Studies of the root-nodule organism of..... 273

Magoon, C. A. and Brunstetter, B. C. Studies upon bacterial spores. III. A contribution to the physiology of spore production in *B. mycoides*. Abstract 33
Maier, F. X. and Demeter, Karl J. Comparative investigations on the microbiological composition and the quality of butter. Abstract 41
Maneval, W. E. The staining of flagella of bacteria, with special reference to mordants 313
Marine, A, denitrifying organism 89

Shonle, H. A., Waldo, John H. and Powell, H. M. The bacteriological evaluation of some new water soluble organomercury compounds..... 323
Shwartzman, Gregory. The phenomenon of local skin reactivity to various bacterial culture filtrates. A review. Abstract..... 56
Smith, George H. and Jordan, Elizabeth F. *Bacillus diphtheriae* in its relationship to bacteriophage..... 75
Spore germination, Influence of osmotic pressure upon..... 197
Spray, Robb Spalding. Demonstration of a simple anaerobic culture dish. Abstract..... 23
Squibb, E. R. and Sons. A comparison of methods for determination of potency as observed on a group of horses immunized against diphtheria. Abstract..... 46
Staining, The, of flagella of bacteria, with special reference to mordants..... 313
Staphylococcus cultures lysed by bacteriophage. A quantitative study of the respiration of..... 143
——, Dissociation in an encapsulated..... 157

Stark, C. N. and Foter, M. J. The importance of feeds as a source of ropy milk organisms. Abstract..... 37
—— and Herrington, B. L. The drying of bacteria and the viability of dry bacterial cells. Abstract..... 13
Stearn, A. E. and Stearn, E. W. The characteristics of certain microörganisms as modified by the reaction of the medium. Abstract..... 18
Steenken, William, Jr. and Petroff, S. A. Biological studies of the acid-fast organism. Abstract..... 11
Sterilization of media, The effect of, upon their growth promoting properties toward bacteria..... 299
Streptococcus infections, A modified Loeffler's blood serum medium useful in the routine health department examination for diphtheria and..... 119
Studies of the properties of a bouillon filtrate of the gonococcus. Abstract.. 58
—— of the root-nodule organism of Lupinus..... 273
Studies of tularemia infection in rabbits and guinea pigs. Abstract..... 50
—— on carbon metabolism of organisms of the genus Mycobacterium. II. Utilization of organic compounds in a synthetic medium..... 361
—— —— —— —— —— —— —— —— —— ——. III. End products of carbohydrate utilization as determined in synthetic media cultures..... 375
—— on pollen and pollen extracts. VI. Rabbit skin reactions in quantitative estimation of activity of pollen extracts. Abstract..... 59
—— on the eye-forming organism of Swiss cheese. Abstract..... 39
—— on the influence of bacteria on the oxidation-reduction potential of milk. I. Influence of pure cultures of milk organisms..... 239
—— —— —— —— —— —— —— —— —— —— —— —— —— —— II. Influence of associated cultures of milk organisms..... 253
—— on the precipitin reaction. III. Further studies on conditions influencing the formation of precipitates. Abstract..... 47
—— on the proteolytic bacteria of milk. V. Action of proteolytic bacteria on milk serum..... 263
—— on typhus fever. Abstract..... 43
—— upon bacterial spores. III. A contribution to the physiology of spore production in *B. mycoides*. Abstract..... 33
Study, A, of the action of short electric waves on several biological substances with special reference to diphtheria toxin. Abstract..... 59
Surface tension, influence of, upon the germination of bacterial spores..... 211
Synthetic media cultures, End products of carbohydrate utilization as determined in. Studies on carbon metabolism of organisms of the genus Mycobacterium. III..... 375
—— medium, Utilization of organic compounds in a. Studies of carbon metabolism of organisms of the genus Mycobacterium. II..... 361
Szymanowski, Waclaw T. and Hicks, Robert Alan. A study of the action of short electric waves on several biological substances with special reference to diphtheria toxin. Abstract..... 59

Tanner, F. W. and Burrows, William. The viability of yeasts in sucrose solutions. Abstract..... 32
—— and Wallace, G. I. The effect of concentrated salt and sugar solutions on the thermo-death times of molds. Abstract..... 32

Taylor, F. A. and Robinson, G. H. The effect of urine on hemolytic streptococci. Abstract 49
Temperature, The effect of, upon the production of hydrogen sulphide by *Salmonella pullorum* 111
Thermophilic microörganisms from imported canned shalots (onions). Abstract 29
Thompson, Luther. The occurrence of diphtheroids in routine blood cultures. Abstract 45
Time-temperature-humidity relations in dried fruit pasteurization. Abstract 30
Tittsler, Ralph P. The effect of temperature upon the production of hydrogen sulphide by *Salmonella pullorum* 111
——, Lisse, Martin W., and Jensen, Otto G. A comparison of colorimetric and potentiometric methods for hydrogen ion determination of solid bacterial media, using a dilution method based on the buffer equation 383
Types of *Br. abortus* isolated from human, bovine, porcine and equine sources. Abstract 52

Upton, Margaret F. and Kopeloff, Nicholas. Serologic studies with *L. acidophilus* (Moro) and *L. bulgaricus* (Grigoroff). Abstract 51

Van Suchtelen, F. Hesselink, Humus as a source of energy for soil microörganisms, and the energy liberated by their activity. Abstract 33
Van Vranken, Marjorie and Hall, Ivan C. A comparative and taxonomic study of thirty-eight strains of *Bacillus tertius* (Henry). Abstract 2
Viability, The, of yeasts in sucrose solutions. Abstract 32

Waldo, John H., Shonle, H. A. and Powell, H. M. The bacteriological evaluation of some new water soluble organomercury compounds 323
Wallace, G. I. and Tanner, F. W. The effect of concentrated salt and sugar solutions on the thermo-death times of molds. Abstract 32
Water analysis, Coli-aerogenes differentiation in 407
—— soluble organomercury compounds, The bacteriological evaluation of some new 323
Weaver, R. H. Electrophoresis studies on *Lactobacillus acidophilus* and *Lactobacillus bulgaricus* cultures. Abstract 51
Weinstein, Louis and Rettger, Leo F. Biological and chemical studies of the lactobacillus genus with special reference to xylose fermentation. Abstract 4
Weiss, Emil. A direct method for the determination of the H-ion concentration of cultures. Abstract 22
——. The influence of antigen-diluents on the intensity of flocculation in the precipitation test for syphilis. Abstract 47
Werkman, C. H., Fulmer, Ellis I., and Williams, Arthur L. The effect of sterilization of media upon their growth promoting properties toward bacteria 299
—— and Gillen, G. Bacteria producing trimethylene glycol. Abstract 6
—— and Osburn, O. L. A method for the determination of ethyl and butyl alcohols in fermentation mixtures. Abstract 20

White, G. E., Prescott, Samuel C., and Hale, J. F. Observations on the bacteriology of slimy beef. Abstract..... 26
White, Harry, Huntoon, F. M. and Funk, E. H. Biochemical studies of bacterial derivatives. XV. Skin reactions in man: A comparison of tuberculin O.T., human tubercle bacillus protein MA 100 and timothy bacillus protein MA 100. Abstract..... 57
Whitman, Loring and Mueller, J. Howard. An improved method for the detection of hemolytic streptococcus carriers..... 219
Whittier, Earle O. and Frazier, William C. Studies on the influence of bacteria on the oxidation-reduction potential of milk. I. Influence of associated cultures of milk organisms..... 239
—— and ——. —— —— —— —— —— —— —— ——. —— II. Influence of associated cultures of milk organisms..... 253
—— and Rogers, L. A. The continuous lactic fermentation of whey. Abstract..... 37
Williams, Arthur L., Fulmer, Ellis I. and Werkman, C. H. The effect of sterilization of media upon their growth promoting properties toward bacteria..... 299
Williams, O. B. The effects of alkaloids on bacteria. Abstract..... 55
Wing, Helen U. and Frazier, William C. Studies on the eye-forming organism of Swiss cheese. Abstract..... 39

Yeast, The effect of, on ammonia and indol production by bacteria in culture and in feces suspension..... 225

Zinsser, Hans and Castaneda, M. Ruiz. Studies on typhus fever. Abstract.. 43
